Title: Airblast Cool Vest (ACV)

THE FUTURE OF BODY TEMPERATURE MANAGEMENT

Airblast Cool Vest provides:

- Worker Comfort
- Heat Stress Avoidance
- Improved Productivity by 22%
- The vest pays for itself in under 2 weeks

- Engineered to maintain a constant 55° F
- Over 2 hours of cooling duration at 90°F
- Reduces heat stress
- Ergonomic design for practical in-the-field ease of use
- Fully adjustable
- Recharge in 20 minutes

Airblast Cool Vest

Airblast's revolutionary Cool Vest technology offers unparalleled cooling power. Unlike ice or gel packs that steadily lose their effectiveness. Airblast Cool Vests will remain at a **CONSTANT 55° F.** for hours of cooling. The Cool Vest can help reduce the chance of heat-related illnesses that sometimes occur in today's difficult work environments.

Airblast Cool Vest: lightweight, quickly recharged, no condensation, and constant temperature. Uses a simple, interchangeable, front/back cool pack system that provides continuous cooling to the worker's upper body. The vests are easily adjustable for maximum comfort and flexibility.

ACV OUTPERFORMS COMPETITION

— ACV @ 55° F — Gel Technology — Ice Technology

Chart based on 6 lbs. tested in ambient conditions at 90° F.

Airblast Cool Vest

The ACV 2 provides cooling for approximately 2½ hours. The period of cooling depends solely on work activity and environmental conditions. Vest material is flame retardant. Fits medium to large sizes. Weight: 2.9 kg. (6.5 lbs.)

ACV Replacement Packs

No waiting. No down time. Keep extra cool packs ready for instant on-site changes. Made of specially engineered plastic, ACV packs are designed to expand up to 400% without damage. The cooling agent within the pack is a safe, non-toxic, and non-carcinogenic formulation. Cool packs may be re-energized thousands of times providing hours of safe, controlled body temperature management. Placed in a cooler of ice water, the cool packs will fully recharge in approximately 20 minutes. However, ice water is not necessary as the phase change technology actually begins recharging the packs whenever they are placed in an environment that is cooler than 55° F.

Portable/Stationary Abrasive Blast Equipment - Nozzles - Nozzle Holders - Hoses - Couplings - Lighting
Wetblast Equipment - High Pressure Waterjetting - Personal Protection - Blast Cabinets - Blastrooms
Vacuum Blast/Recovery Equipment - Portable/Stationary Wheelblast Equipment - Dehumidifiers
Pipe Cleaning/Coating - Air Treatment - Mobile Dust Collectors - Media - Paintspray Equipment
Plural Component - Measuring Instruments
