**Title:** Airblast Electro Cleaners

## Airblast Electro Cleaners 220 Volt

### Properties of the Airblast Electro Cleaner.....

For over 30 years Airblast provides very powerful electric suction units to all kinds of industry as well as for offshore and marine applications. These mobile suction units, which are available from 1,6 kW to 2,4 kW in as well 110 and 220 Volt, will pick up everything which fits through a hose en is of such design that they will meet the demands the industry requests.

The Airblast electro cleaners are high quality, reliable suction units designed to solve numerous cleaning tasks, dry and wet, in all types of industry.

### **Airblast electro cleaners..... How do they work?**

The Airblast electro cleaners have powerful motors which creates a high suction capacity. Separate cavities for cooling air and suction protect the motors against moisture and overheating. A multi-phase switch prevents overloading of the mains supply when the unit is started. Superior design and high technical quality means simple maintenance and long life. Models with cooling air filter and thermo-switch prevent overheating and motor failure in dusty environments. An extensive range of accessories are available to solve all suction problems.

### **AIRBLAST Bb115**

Single container system, designed for heavy industrial cleaning of oil, chemicals, mud, cooling liquids, and water as well as short metal shavings, powders, sand and other granules. Suction equipment is made for heavy duty work. Engineered so that trolley mounted container easily tips to empty materials.

Motor power: 2.0 kW  
Voltage : 230  
Max.vacuum: 2150 mm water column  
Max.airflow : 460 Nm<sup>3</sup>/hour
