Title: Product Improvement

NEW IMPROVED HOSE CONNECTION PANORAMA BLAST HELMET

Introduction

With the new Extreme blasting helmet Airblast introduced the 22 mm hose with connection for the blasting helmets. Now the Panorama blasting helmets will also be equipped with the same hose connection and 22 mm hose. This will also affect the airflow indicator and adaptor of the Panorama helmet because of the different connection.

This means that as of today all Panorama helmets will no longer have the old 16 mm hose. At the same time there will be one and the same hose for both blasting helmets. Finally the old 16 mm hose will still be available to serve existing customers with current helmets.

Old connection

New connection

Part Numbers

Following part numbers have changed in the new version of the Panorama shotblasting helmet.

Part no.	Description
----------	-------------

40509 *	Adaptor (type Extreme, Panorama)
