

AB2030

Vacuum Cleaner - Electric

AIRBLAST

This electrically driven vacuum suction machine is characterized by its solid build and finish, simplicity and high operating reliability. With its 2,000 W strong exhaust motors can be used for cleaning of AB2030 EL (heavy) soiled floors, workplaces and machines. In addition, he can also be used for vacuuming of abrasive, granulates and coarse dirt parts.

The aspirated material can be discarded, by the machine to lift (lifting) and above a large waste bin or bag. The machine is supplied with a 5 meter very wear-resistant polyurethane lined, very wear-resistant suction hose and various different suction mouths.

Applications:

- Cleaning of floors
- Cleaning of machines
- Cleaning of blasted area
- Removing of abrasive
